Design overview

Option 1 uses complete BUCO Insta-Cupboards on both long walls of the walk-in closet. Each side contains two shelf cupboards and two hanging cupboards, creating a symmetrical 3.6 m cupboard run per wall. The selected BUCO units already include their own standard hinged double doors and hardware, so no sliding tracks, rollers, custom door panels or additional door components are required.

Dimension / feature	Design value
Room internal size	3890 mm long x 2260 mm wide
Ceiling / roof	3570 mm high end -> 2880 mm low end
Cupboard dimensions	2250H x 900W x 580D mm each
Cupboard run per side	3600 mm (4 x 900 mm)
Clear central walkway	1100 mm
Door	900 mm centred; 680 mm wall each side
Window	1460 mm centred; 400 mm wall each side
Spare wall length	290 mm per side run; approx. 145 mm at each end
Clear space above cupboards	1320 mm at high end; 630 mm at low end

Cupboard arrangement per side

900 mm shelf + 900 mm shelf + 900 mm hanging + 900 mm hanging = 3600 mm. The same arrangement is mirrored on the opposite wall. With the room length at 3890 mm, this leaves 290 mm spare along each cupboard run, which can be divided into approximately 145 mm at each end for finishing gaps or filler panels.

Door arrangement

All eight cupboards retain their original BUCO hinged double doors. No sliding-door system is included in this option. The 1100 mm central aisle is sufficient for normal use, although opposing cupboard doors should not generally be opened fully at the same time.
